

Module 7

1. According to communicate with my classmates, they indicated that they like the format of my portfolio as well as whole structure of it. Because they were able to obtain a lot of details about me through reading my work. However, the specific color of my design and also the images should be considered more carefully. Actually, my images do not closely related to my theme to some degree.
2. To be honest, I took a big part of my classmates' suggestions based on my portfolio. The reason is that I also agree with theirs impressions about my designing. So I deleted some images, which did not make any sense to my work so that showing my designing in a more effective way to my users. During the previous period, I could not distinguish the differences between my "Writing" and "Blog" object, and I also confused why I wanted to out these two thing together in my portfolio. But I ultimately understood which specific tasks I need to do about "Writing" as well as "Blog". I would insert some of my personal writing projects in the "Writing." The "Blog" should be my course requirement, so I just wanted to show my users what I did during WRA 260 class.
3. Through the interaction with classmates, I learned that the style of designing plays an essential role in making a good portfolio. My brain about designing the portfolio has been broaden according to review other classmates' assignment, and it is helpful for me to improve the quality of my personal portfolio in a better way.
